Education Background

- Aditya Engineering Collage
Computer Science And Engineering
8.29 cgpa till date
2020-2024 (current)
- Madhuri Junior Collage
MPC
9.63 cgpa
2018-2020

Soft Skills

- Observation
- Decision making
- Communication
- Multi-tasking

Strength

- Self Motivated
- Able to grab things Quicker

Key Skills

- Programming Languages : Java
- Mark up Languages : HTML5
- Scripting Languages : Java Script
- Front End : React, Bootstrap
- Back End : Node , Express js
- Data Base : Sql, Mongo DB
- Tools: VsCode, Git, Figma

About Me

To be a part of the Environment which helps me to encourage and grow in the society where I can Utilize my Skill's and Knowledge for the sake of Development. Able to Survive in a place among the compitative World .

Certifications

- Java Programming , Java Foundations jan'23
Oracle Academy Surampalem
- JavaScript IT Specialist, Pearson jan'23
Technical Hub Surampalem
- Java Basic , CSS jan'23
Hacker Rank Surampalem
- HTML-5 feb'23
Infosys Spring Board Surampalem

Projects

Resource Management System, April 2023 (Node JS, Mongo DB, React, Express JS)

- The Aim of the project is to Provide the resource where there exists a Relation Ship between the Admin and the User.
- UI was created with React js and the details were stored in the Mongo DB database with REST API and Express JS.
- For Responsiveness And Designing of this Application were done using Bootstrap5 and CSS3.

Capstone Project | School Portal Sep 2nd-2022 to Sep 7th-2022

- The objective of this portal is to provide the functionality to asses the Statistics of the students and their portfolio.
- UI was created with Html, CSS and for the responsiveness we used the Bootstrap5

Internships

Technical Hub

Full Stack Development- Intern

Jul '22 – Nov '22

Surampalem/On-Site

During my training period, I have gained significant knowledge on Full Stack Development. I learned how to create static web pages using HTML and CSS, and then how to enhance their responsiveness using Bootstrap, which is a CSS framework. Subsequently, I learned how to implement functionalities and create component-based applications using React JS. To connect websites to web servers, I gained proficiency in Node and Express JS. To store data, I learned to use MongoDB as a database. Overall, these skills have helped me become a competent Full Stack Developer.
